Compatible with electric vehicles

The new Continental PremiumContact™ 7.

German engineered safety for outstanding comfort.

Look forward to handling any weather.

Since weather conditions should never impact your level of safety and driving comfort, we designed a tyre that allows precise handling on wet and dry roads. Due to its adaptive pattern technology, this tyre can take you anywhere without ever leaving your comfort zone.

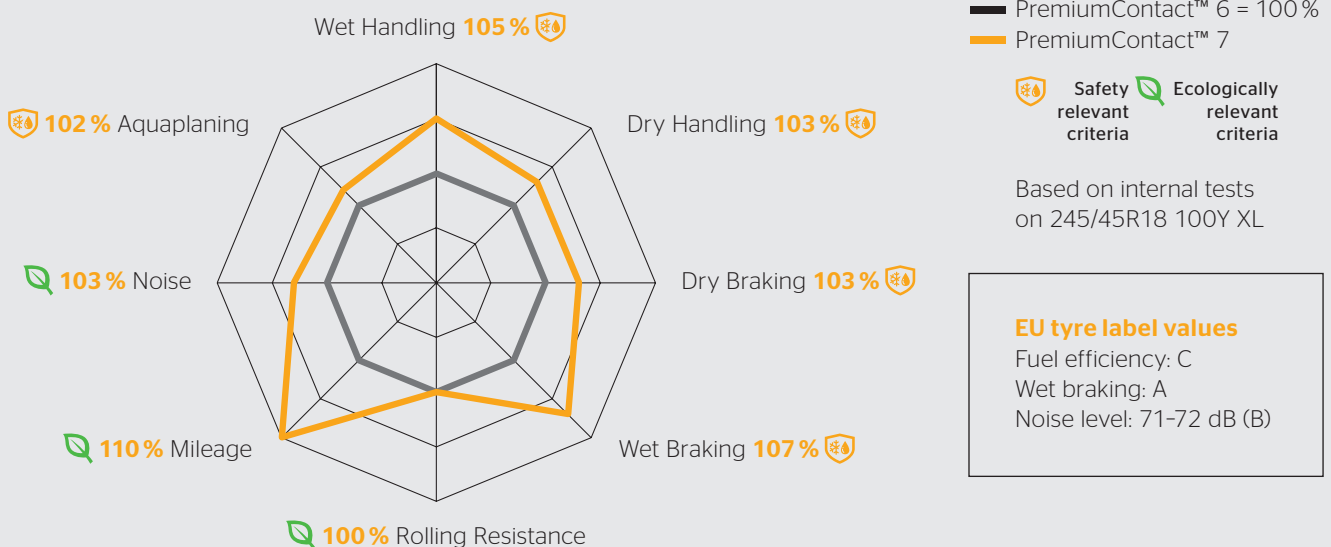

Comfort meets safety, no matter which drive you choose.

Whether you want to take your family for a summer road trip in your saloon car or just enjoy driving in your electric hot hatch, the PremiumContact™ 7 provides outstanding comfort, reliable safety and improved mileage independent from the vehicle configuration. Because we think that a premium driving experience shouldn't depend on the type of car you drive.

No need to warm up first.

'Every runner needs a proper warm-up first!' We have all heard that sentence in sport. But every rule has an exception. The new RedChili compound of the PremiumContact™ 7 makes you skip any heat-up phase and enables safe braking right from the start. Time to experience a tyre that is ready before you are.

Performance.
